ROAM: an A3 trigger with a margin per user and per neighbour

Outcome memory
useful / unnecessary /
early / late, per place

Path overlap
share of the next
seconds in each cell

Service class
interruption
sensitivity (5QI)

$$m_{ij} = h_0 + \eta_H H - \eta_L L + \eta_S w_s - \eta_A \gamma \, \Delta f \quad \textbf{[dB]}$$

Hand over to j if $\mathrm{RSRP}_j - \mathrm{RSRP}_c > m_{ij}$ for the time-to-trigger
